PROFESSIONAL PROFILE

A motivated and enthusiastic Software Development Intern at LC Studio with a strong background in front-end, back-end, and database development. Having completed the YouthCode Software Development Project at Life Choices Academy, I am currently building real-world experience through an ongoing 6-month software development internship at LC Studio. As the founder of a weekend venture (Braids by Nella), I bring real-world business acumen, client management, and practical problem-solving into software engineering. A quick learner who thrives in collaborative environments and is eager to contribute to high-impact technical projects.

CORE SKILLS

- HTML, CSS & Front-End Development
- E-commerce Development & ICT Fundamentals
- Communication & Team Collaboration
- Adaptability & Continuous Learning
- Database & Back-End Development
- Problem Solving & Technical Troubleshooting
- Time Management & Task Prioritization
- Entrepreneurship & Client Management

EDUCATION & TRAINING

YouthCode Software Development Project — Life Choices Academy

Completed: October 2, 2026

A comprehensive software development program designed to equip candidates with practical technical competencies across full-stack web development, database architecture, and personal leadership skills.

- **Module 1:** Introduction to ICT
- **Module 2:** Front-End Development
- **Module 3:** Database and Back-End Development
- **Module 4:** E-commerce
- **Personal & Professional Development:** Communication, teamwork, and career readiness

Matric Certificate — Spes Bona High School

2020 – 2024

WORK & INTERNSHIP EXPERIENCE

Software Development Intern — LC Studio

October 2026 – Present

Participating in an intensive 6-month software development internship program following graduation from Life Choices Academy.

- Collaborating with cross-functional development teams to build digital components, write efficient code, and maintain software solutions.
- Applying both front-end and back-end tools to address real-world client requirements and software engineering tasks.
- Demonstrating continuous technical learning, adaptability, and proactive problem-solving within a professional agile workflow.

Founder & Manager — Braids by Nella

2022 – Present (Weekend Operations)

- **Client & Workflow Operations:** Oversee end-to-end service delivery, schedule management, and client communication, applying strong project management and organizational discipline.
- **Financial & Business Logic:** Manage service pricing, revenue tracking, inventory budgeting, and basic financial planning to sustain business growth.
- **Digital Marketing & Customer Engagement:** Leverage social media channels and digital marketing strategies to build brand presence, analyze customer engagement, and maintain a loyal customer base.
- **Work Ethic & Time Management:** Successfully manage weekend business commitments alongside full-time software internship responsibilities, demonstrating exceptional self-drive, punctuality, and time management.

Customer Service & Food Assistant — Sivuyise's Fast Food

2021 – 2022

- Operated cash registers, managed point-of-sale transactions, and provided friendly service to high volumes of daily customers.
- Prepared food items in adherence to hygiene regulations and maintained clean, safe work environments.
- Worked collaboratively with team members under fast-paced conditions to reach shift sales targets and maintain high customer satisfaction.
